

AI Enhanced voice prompts without the middleman

A native macOS voice layer for developers
who bring their own LLM API key.

Whispkin

Most voice AI tools add a middleman

Typical path

Whispkin path

No Whispkin proxy server. No extra company in the middle.

Three steps from thought to prompt

You own the keys. You pick the models.

BYO API keys

You own your keys. You stay in control.

Mix providers

Transcribe with OpenAI or Gemini.
Correct with OpenAI, Claude, Gemini,
or Perplexity.

Built for developer workflows

Menu bar native. Hotkey.
Paste where your cursor is.

Make voice supercharge your LLM workflow

Native macOS. Bring your own API keys. Free. No ads.
